

Smoke Outlook for 9/02 - 9/03

CentralCoast :Dolan Fire

Issued at: 2020-09-02 07:52 PDT

Fire Information

Dolan Fire: Fire activity yesterday was once again moderated due to the marine layer in the western perimeter and a smoke inversion over the eastern perimeter. The fire continues to spread to the east into the Ventana Wilderness. For detailed information on the Dolan fire: inciweb.nwcg.gov/incident/7018

Smoke

Similar conditions are expected today as yesterday, but change is on the horizon with warmer and drier conditions and limited marine layer stratus and fog to the forecast area in the next few days. Smoke conditions throughout the forecast area are predicted to see Good to Moderate air quality. High level haze may be observed due to regional fires. Intensity of the smoke will continue to depend on the activity of the fires in and around the forecast area.

Other

Air quality may change unexpectedly. If you begin to notice health effects from smoke, you are encouraged to follow the "actions to protect yourself" listed below.

Daily AQI Forecast* for Sep 02, 2020
